INDIANA DAHLIA FARMS

Thos. D. Sherfick

New Albany Indiana
Introducing Our New Fall Catalogue to Our Many Friends

Starting Out With New Low Prices—Looking Forward to a Glorious Future

I know that this catalogue will interest my friends everywhere. For ten years I have specialized in growing the finest dahlias, and now have some forty or fifty acres of them, and thousands of friends and satisfied customers. It takes a lot of help and equipment to handle the volume of business that we do in a few short spring months, and then when we have the dahlias planted, nothing to do but keep them cultivated until digging time. This is very expensive, for I have a few folks who have been with me ever since I started, and I want to give them employment the year round.

Now Here’s What I’ve Planned

Every one of my friends who have bought and are interested in Dahlias must be interested in other flowers, and with this in mind two years ago I started a field of Iris, Peonies, and all kinds of Perennials, etc., and a finer lot of bulbs and plants couldn’t be had, and plenty for everybody. The bulbs, such as Tulips, Hyacinths, etc., are grown for us in Holland, by one of the best and largest growers in that country. Everything we offer in this book is guaranteed to give you full satisfaction in every respect, or we will replace free of charge.

Startling Low Prices

You will find this catalogue chuck full of bargains and special offers. It is a veritable storehouse for yard and garden at rock bottom prices, and satisfaction guaranteed.

And Another Thing

I want you to know that we are all working for you and we must please you. If there are any questions that you would like to ask, write us, and we will do what we can to give you the answer. Write me personally. I am never too busy to give your letter first place on my day’s schedule.

Now here’s something you can do for me. I would appreciate it if all of my friends would help us to make this new venture a big success, and I’ll do my share in sending you the finest stock that can be grown.

Sincerely yours,

THOS. D. SHERFICK,
President Indiana Dahlia Farms.

PEONIES do best when planted in Fall. They get well established before winter sets in and ready to start growing with the opening of Spring.
Hardy Garden Lilies

For color, fragrance, beauty, and variety of form, nothing can equal these grand flowers; whether grown in pots or grouped in the hardy plant border, where their hardness makes them so desirable, they are always an object of beauty.

Lily bulbs, being of late maturity, are not ready before November and December (the best time to plant them).

Set of 8 Hardy Garden Lilies, $2.40

CALLA LILIES

These like a stiff, clayey soil with a small quantity of shredded cow-manure. Bulbs should be set with the crown, or top, protruding just above the surface. When in growing condition, warm water given several times during the week will hasten the flowering period and increase the number of blooms. The Yellow Calla is one of the grandest varieties in cultivation, and most valuable for house or conservatory decoration. Plant Calla indoors only in the fall of the year.
WHITE CALLA LILY. Selected Bulbs. Each 25c, dozen $2.50.

GODFREY EVERBLOOMING. This is a great improvement over the ordinary white Calla. The flowers, while a trifle smaller, are of purer white and delicately scented. Strong flowering bulbs, each 25c, dozen $2.50.

YELLOW CALLA LILY. A grand novelty—one that should be planted extensively. The deep golden flowers are truly magnificent and produced in abundance. The green foliage spotted creamy white adds to its beauty. Selected bulbs, each 45c, dozen $4.50.

Hardy Everblooming Roses

Roses do so well in our climate that we often wonder why people do not plant more of them. The monthly roses with even the smallest amount of attention will produce blooms April to November.

Prices, all varieties: Strong 2-year-old plants, $1 each, $9 per dozen. Specimen plants, $1.75 each. Smaller plants, 75c each, $7.50 doz.

The following list while not extensive will give you some of the best; however, if others are wanted let us know and we will be glad to fill your order:

MADAM BUTTERFLY. A symphony of white, bright pink, apricot, and gold, the buds being a rich Indian red, yellow at the base. Truly a wonderful rose.

PAUL NEYRON. One of largest blooming roses, the canes have very few thorns, making it a very desirable variety for the garden and cut flowers. Flowers a clear pink shaded rose.

PINK RADIANCE. One of the newer roses, extra large, vigorous grower, one of the best garden roses. Its color is a beautiful blending of carmine-rose with shades of opal and copper.

PREMIER. A rose of very deep rose color, a fine variety of large size and distinct character; being practically thornless makes it one worthy of a place in your rose garden.

SOUV. DE PRES. CARNOT. A rose of merit, flesh color shading to a white; beautiful in bud, an excellent cutting rose.

ANNIE LAURIE. A new rose, a strong grower and heavy bloomer; deep pink in color shading to a golden color at the base.

A Mixed Border of German Iris.
Narcissus or Daffodils

There are no hardy bulbous plants which have more points of merit than the Narcissus. Perfectly hardy, growing and doing well in almost any soil, they have a preference for a good, deep soil, and a semi-shaded position—amongst the grass, under the trees, etc. Such places could not be used to better advantage than by filling with Narcissus. They are equally desirable for pot culture or for Winter flowering. Three or four bulbs can be put into a 5-inch or 6-inch pan or pot, and with the same treatment as given to Hyacinths. But it is outdoors that Narcissus do best, and if planted in October or November out in the open ground in a good soil, let them remain undisturbed. After flowering let the leaves die back, but do not cut them off or the bulb will not flower next year. Set 5 inches deep and 6 to 8 inches apart. The bulbous roots will multiply and send up fine long flower stems every Spring. Be sure to keep the ground moist during the growing season if season is dry. We handle only strictly selected bulbs that are sure to produce satisfactory returns.

EMPRESS (Bicolor). A strong, robust grower, extra large flowers; perianth pure white, well expanded, and trumpet of rich pure yellow; one of the best bicolors. Each 14c, ½ doz. 75c, doz. $1.45, 100 for $11.00.

EMPEROR. One of the largest and finest Daffodils in cultivation; pure yellow trumpet of immense size, and wide overlapping, rich primrose perianth; for bedding, naturalizing or for growing in the house it is unequalled. Each 14c, ½ doz. 75c, doz. $1.45, 100 for $11.00.

GOLDEN SPUR. A very good variety, both perianth and trumpet being of a rich yellow color. It is of unusually robust habit and unsurpassed for garden, pots, or forcing. Each 14c, ½ doz. 75c, doz. $1.45, 100 for $11.00.

SPRING GLORY. Clear white perianth with long petals of splendid form, long trumpet of deep yellow, well reflexing at the brim. A very vigorous grower and one of the best of the newer Daffodils for pot culture. Each 16c, ½ doz. 85c, doz. $1.60, 100 for $12.50.
PAPER-WHITE GRANDIFLORA
The Popular Large-flowered Bunch Narcissus for Christmas Blooming Either in Soil or Stones and Water.

A very decorative class of bulbous plants for greenhouse and window garden. They produce large trusses of bloom and are quite fragrant. There are hardly any of the Narcissus that respond to forcing so easily and quickly, and a large number of florists have them in bloom from November until Easter. The variety Paper-White can be grown in water, with pebbles, in shallow dishes or bowls. Six bulbs to be planted in an ordinary-sized dish. It is advisable to start the bulbs in a dark place for four to six days. Grow cool and give plenty of water. In order to grow successions of blooms during the entire winter, plant every two weeks. Mammoth Large-flowering Bulbs, 1½ doz. 40c, dozen 75c, 100 for $7.50.

DOUBLE-FLOWERING NARCISSUS VON SION

These old-fashioned daffodils are still very popular and though they lack the sturdiness of some of the single varieties as bedders, they have a delightful fragrance and are excellent for cutting, while the old Von Sion has no equal. This is the old favorite variety, so highly prized in old-fashioned gardens. Excellent for either forcing or cut flowers. If planted out-of-doors it can remain where planted for a number of years.

The well-known Double Yellow Daffodil. Large, double, golden-yellow. This is the true double trumpet shaped variety. Each 15c, ½ doz. 85c, doz. $1.65, 100 for $12.50.

CHINESE SACRED LILY
American Grown Single Nose
Although the flower is popularly called a Lily, it is a Narcissus of the Polyanthus type. It is grown by the Chinese from time immemorial to decorate their temples of Joss houses on their New Year’s day, which occurs in February.

They succeed everywhere and with everybody. The Chinese Lilies are usually grown in bowls or dishes of water. Put an inch or two of sand and gravel in the dish in which they are to be grown, set the bulbs on this and put enough pebbles around them to keep them from falling over; then fill the dish with water and set in a dark place for a few days, bringing them to the light when the roots have started freely. Each 15c, 2 for 25c.

SPECIAL OFFER
One large bulb each of the 6 beautiful Narcissus, each labeled separately, only 75c; ½ dozen of each, $3.95; 1 dozen of each, $7.50.

AMARYLLIS
AMERICAN NEW HYBRIDS
(House Plant)
One of the finest strains of Amaryllis we have ever seen. Flowers are immense, borne mostly two and three to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains. The bulbs are all large, three inches or above, and are sure bloomers. 75c each, 3 for $2.00.

Amaryllis.
Selected Hyacinths

Culture of Hyacinths

For general use the Hyacinth is one of the best hardy spring bulbs. It is easily cultivated, blooms early in Spring, remains a long time in flower, ranges so many rich and delicate colors that all tastes can be suited. Its delightful fragrance is enough to make it a general favorite.

Outdoor Culture

The Bulbs may be planted any time from October to December. They succeed in any good, well-drained garden soil. Set the bulbs so that the tops will be 5 or 6 inches apart. Before very severe weather comes on, cover the beds with straw, leaves or manure, to protect them from the frost; this should be removed when danger from hard frost is past in the Spring.

Pot Culture

Pot culture of Hyacinths is very fascinating. Use a light soil to fill the pots. Pot fairly firm and let the tip of the bulb just peep out of the soil. After potting water them well and then set the pots in a cool, airy place, covering the pots with ashes until the bulbs are rotten. They should remain in the dark for 8 weeks or more, when they can be brought to the light. A shady position is best for a few days, after which they may be placed where they are to bloom. One bulb is enough for a 5-inch pot, or 3 bulbs in a 6 or 7-inch pot or pan.

QUEEN OF THE BLUES. Fine light blue with beautiful silvery shade, fine large spike. One of the best pot Hyacinths for medium late.

Giant Flowering Crocus

Among the earliest to blossom in Spring is this beautiful little flower, lifting its head almost before the snow has disappeared. The showy funnel-shaped flowers borne erect from the grass-like leaves are most welcome visitors in the early Spring sunshine.

Although most showy when massed in large beds, or when planted in lines of distinct colors, a very desirable effect is produced by setting Crocuses here and there over the lawn. It is only necessary to lift the turf and insert the bulbs about two inches deep.

Crocuses will care for themselves, blooming very early amid the grass and dying down to the bulbs in ample time to be entirely out of the way of the lawn mower. The crocus should be planted in the autumn, in any good garden soil, about three inches deep and about two inches apart, if in beds or borders.

**CHOICE MIXTURE OF CROCUS.** The following mixture is well adapted for bedding or planting in conspicuous places on the lawn. The bulbs are all very fine and sure to please. $\frac{1}{2}$ doz. 20c, doz. 35c, $2.50 per 100.

Gorgeous Single Early Tulips

There are no tulips which make such a rich and gorgeous display of blossoms with so little care and cultivation as do these early tulips. They can be cultivated very easily, only requiring good common garden soil, growing to perfection. Set out any time after September the first until ground freezes to hard, four inches deep and four inches apart. After being once started a tulip will continue to grow every spring without further attention.

Mammoth Breeder Tulips

The Breeder Tulips have been favorites in Holland for centuries, but it is only within recent years that they have become known and appreciated in America, and now they bid fair to rival the Darwin Tulips in popularity.

Their majestic size and remarkable colors place them distinctly in a class by themselves. Every lover of the more somber shades cannot fail to revel in the rich and artistic blendings of purple and old gold, bronze and terra cotta, brown and violet, and buff and maroon found among the Breeders. They are late to bloom but surpass in size and vigor the Darwins, although lacking the color brilliancy of the latter. The flowers are, many of them, sweet-scented and all splendid for cutting as they retain for a long time their form and color.

CARDINAL MANNING. A curious blend of mauve and rose, which changes to an almost pure orange at the extreme edges of the petals. Height 28 inches. ½ doz. 45c, doz. 85c, 100 for $6.00.

DOM PEDRO. The finest deep coffee brown with narrow edge of golden brown. Should be in every garden. Height 24 inches. ½ doz. 65c, doz. $1.25, 100 for $9.00.

PANORAMA. A very large reddish mahogany tulip; the flowers remain in bloom a long time. Height 26 inches. ½ doz. 40c, doz. 75c, 100 for $5.25.

Giant May Flowering, or Darwin Tulips

The late flowering Darwin Tulip has outclassed all its predecessors in type style and beauty, and is at the present the queen of the tulip family. The remarkable brilliant colors and splendid substance are distinctly globular or cup-shaped flowers of large size; their long strong stems and robust growth of plant make them unsurpassed for blooming in the garden. Darwins are not only very desirable for outdoor bedding and last a long time after cutting, but have an advantage over other classes of tulips in that they may be forced in pots provided it is done slowly. Another remarkable characteristic of Darwins is that the color inside the flower is just as bright and sometimes even brighter than the outside.

**BARTIGON.** Fiery red. One of the most beautiful tulips in cultivation. Tall stiff stems, petals extra large, remaining in bloom for a long period of time. Height 26 inches. ½ doz. 35c, dozen 60c, 100 for $4.00.

**PRINCESS ELIZABETH.** Large flower; soft rich rose toning to silvery-rose at edges. Inside deep rose, white base. Highly recommended. Height 26 inches. ½ doz. 35c, doz. 65c, 100 for $4.50.

**PRIDE OF HAARLEM.** Brilliant rosy carmine, with blue base; very large flower of superb form, borne on a tall strong stem.
